

# Taylor Chen

## Recent Computer Science Graduate

taylor.chen@email.com | (555) 456-7890 | github.com/taylorchen

### Professional Summary

Motivated recent graduate with strong foundation in software development and data structures. Completed multiple internships and personal projects. Eager to contribute to innovative tech solutions.

### Experience & Projects

|                                                                        |                     |                            |
|------------------------------------------------------------------------|---------------------|----------------------------|
| <b>Software Engineering Intern</b>                                     | <b>InnovateTech</b> | <b>May 2024 – Aug 2024</b> |
| • Built RESTful APIs using Python and Flask                            |                     |                            |
| AI/ML Project                                                          | Personal Project    | 2023                       |
| • Developed image recognition model with 92% accuracy using TensorFlow |                     |                            |

### Education

B.S. Computer Science, Stanford University, Expected Graduation: May 2025  
GPA: 3.8/4.0

### Skills

Python, Java, C++, SQL, React, Machine Learning, Git
